

CD20 rabbit mAb(ABT219R)

Catalog No.	IML0135
Reactivity	Human; Mouse
Applications	IHC-p
Gene Name	MS4A1 CD20
Protein Name	CD20
Human Gene Id	3662
Swiss-Prot	P11836
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Source	Monoclonal, Rabbit: IgG
Dilution	IHC: 1:100-200
Purification	The antibody was affinity-purified from Cell supernatant by affinity-chromatography using specific immunogen.
Concentration	-
Storage&Stability	-20°C:1 year
Background	This gene encodes a member of the membrane-spanning 4A gene family. Members of this nascent protein family are characterized by common structural features and similar intron:exon splice boundaries and display unique expression patterns among hematopoietic cells and nonlymphoid tissues. This gene encodes a B-lymphocyte surface molecule which plays a role in the development and differentiation of B-cells into plasma cells. This family member is localized to 11q12, among a cluster of family members. Alternative splicing of this gene results in two transcript variants which encode the same protein.
Subcellular Location	extracellular space,integral component of plasma membrane,external side of plasma membrane,extracellular exosome,
