PRODUCT DATA SHEET

Cyclin E1 Polyclonal Antibody

Catalog No.	IPB0111
Reactivity	Human; Mouse; Rat
Applications	WB; IHC-p; IF/ICC; ELISA
Dilution	WB: 1:500-1:2000 IHC: 1:50-1:200 IF: 1:50-1:200 ELISA: 1:10000
Gene Name	CCNE1
Protein Name	G1/S-specific cyclin-E1
Human Gene Id	898
Swiss-Prot	P24864
Formulation	Liquid in PBS containing 50% glycerol, 05% BSA and 002% sodium azide
Source	Rabbit
Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen
Concentration	1 mg/ml
Storage&Stability	-20°C/1 year
Subcellular Location	Nucleus
MW	47077
Background	The protein encoded by this gene belongs to the highly conserved cyclin family, whose members are characterized by a dramatic periodicity in protein abundance through the cell cycle Cyclins function as regulators of CDK kinases Different cyclins exhibit distinct expression and degradation patterns which contribute to the temporal coordination of each mitotic event This cyclin forms a complex with and functions as a regulatory subunit of CDK2, whose activity is required for cell cycle G1:S transition This protein accumulates at the G1-S phase boundary and is degraded as cells progress through S phase Overexpression of this gene has been observed in many tumors, which results in chromosome instability, and thus may contribute to tumorigenesis This protein was found to associate with, and be involved in, the phosphorylation of NPAT protein (nuclear protein mapped to the ATM locus), which participates in
